

BERTOLINI®

L-Brackets

Overview

L-Brackets are designed to stabilize chairs by screwing the legs into the floor, so the chair doesn't move. They come as a set of two brackets with self-tapping screws. One screw goes into the chair and the other goes into the floor.

This accessory is designed to be installed by a licensed contractor who is skilled in anchoring furnishing to flooring surfaces. Bertolini assumes no responsibility for installation.

Note: This accessory is designed to work with chairs manufactured by Bertolini. We cannot guarantee it will work with chairs from other manufacturers. Use with non-specified chairs is done at the buyer's own risk. Customers with existing Bertolini chairs should call customer service to confirm it will fit.
